

Herts and Essex School and Science College 'Cacti and Succulent' Project. 2025

Art Club Succulents and Cacti Project

Week Three: Making relief tiles with Clay, Students used plants to study.

This project was funded by The Art Society Community Grant and The Art Society Bishop's Stortford (TASBS) and proved to be a great collaborative success between the teachers and staff of the Art Department at Herts and Essex school, TASBS and the Bishop's Stortford College Art Department. Thanks to the Bishop's Stortford College for the loan of their kiln. As a result, the Herts & Essex pupils were able to use hand modelling clay and experiment with a variety of glazes before firing their models.

At our Art Society January 2025 meeting at South Mill Arts, the school's art club student's unique clay models representing either cacti or succulent plants were displayed in the reception area by the school's Art Technicians. Art Society members then received a presentation on the educational journey the art club students underwent to achieve the stunning outcomes on view. For more details, please see our [February 2025 Newsletter](#) on this site.
